

Name of Program	Training and Retaining Early Care and Education Providers
Description	Recruit more individuals, through 6 different training projects, into the early care and education field; raise the graduation rate from quality training programs; and boost the retention of qualified providers in order to stabilize the child care workforce. Produce an inventory of training programs statewide. Another goal is to raise the number of teachers or providers working with underserved populations, including children whose primary language is not English, infants, and children with special needs, in regions of the state with particularly scarce supplies of licensed child care programs. PACE will evaluate these projects comparatively to discern their relative effectiveness over time.
Administering Agency and Partners	Policy Analysis for California Education (PACE)
